

## 02 Metallic

## ECLIPSE®

**Eclipse pumps represent a dramatic advance in pump technology.** Combining proven design principles with state-of-the-art engineering; it is the most reliable, simple, and intuitive pump on the market today. Service only takes minutes, thus reducing process downtime and maintenance costs. It is commonly used for applications in industries such as chemical processing, petrochemical, and water treatment.

### Applications

pH control, odor control, acids, caustics, hydrogen peroxide, ammonia

### Flow

up to 0.45 gpm (1.7 lpm)

### Differential Pressure

up to 150 psi (10 bar)

### Temperature

up to 150°F (66°C)  
up to 200°F (93°C) with deration

HOUSING	316LSS	ALLOY C
MAGNET	Neodymium in 316LSS welded	Neodymium in Alloy C welded
DRIVE GEAR	316LSS	Alloy C
IDLER GEAR	PTFE	PTFE
LINER	Carbon Reinforced PTFE	Carbon Reinforced PTFE
SHAFTS	Drive: 316LSS    Idler: Alumina ceramic	Drive: Alloy C    Idler: Alumina ceramic
BEARINGS	Carbon Graphite or Graphite-impregnated Silicon carbide	Carbon Graphite or Graphite-impregnated Silicon carbide
O-RINGS	PTFE	PTFE

## ECLIPSE® 02 Metallic

### Specifications

Gear type	External spur gear
Bearing type	Sleeve bearing
Max differential pressure	150 psi (10 bar)
Max flow	0.45 gpm (1.7 lpm)
Max temp	up to 150°F (66°C), up to 200°F (93°C) with deration
Min temp	-40°F (-40°C)
Motor frame size	NEMA 56C IEC 63,71 B3/B14
Standards	ATEX, CE
Viscosity	1,000 cPs

### Features & Benefits

- Available in 316LSS or Alloy C for chemical resistance
- Magnetically driven, eliminating the need for costly mechanical seals
- Patented renewable housing liner reduces repair costs
- One-piece gear and shaft assembly eliminates common gear failures at the keyway
- Designed for easy maintenance

#### Zero Leakage

- Sealless design
- Zero emissions of hazardous or regulated chemicals

#### Built for the harshest environments

- Ideal fit for many medium to highly corrosive liquids
- Fully encapsulated magnets
- Superior chemical resistance

#### Ease of maintenance

- Front pull-out design
- Quick and easy service
- Piping and electrical stay in place
- Reduced downtime
- More production
- KOPkit® (Keep on Pumping kit) saves time and money
- Simplified orders and inventory

#### Controls

- VFD: motor speed
- RV Controller: intelligent motor speed

**Spec Pulsafeeder.**
